FIELD STUDY 6
Deployment Narrative Report

Name: Gille, Mercy B.
School Assigned: Caranglaan Elementary School
Year & Section: 3rd year & UP-FC1-BEED3-1
Date of Deployment: February 27, 2023 – March 01, 2023
Cooperating Teacher: Mrs. Rachele O. Andaya
Grades & Sections observed: Grade 3 – Mapaabeba

Guide Questions:

1. What are the relevant experiences you gained during the 3-day observation period in your respective cooperating schools?

Our teacher always said that teaching is the noblest profession and I would agree with them because during my observation they made me realize that teaching is not an easy job. When you are teaching it requires full dedication, love, and compassion in teaching and to your learners. Also, the teacher must be dedicated when it comes to teaching. That's why he/she has the ability to inspire the learners through their actions, attention, and approaches during the discussion, activity or even inside and outside the classroom. The field study subject is significant because it allowed us a chance to see the differences between private and public school realities, as well as the various student kinds, attitudes, and behaviors, as well as the various tactics used by teachers to deal with the learners.

During my three day observation period at Caranglaan Elementary School, I've encountered a lot of things that inspire me as an education student who dreams to become a great teacher someday. I learned a lot about classroom management, how to assess the learning of the students, and how to respond to different types of students. On my first day, February 27, 2023, it's Monday, a flag ceremony was held. During that day I was assigned to the Grade 3- Mapaabeba, the advisory of Mrs. Rachele O. Andaya. As I entered the room that I was assigned, my first impression of the classroom was a good surprise. The classroom is very clean and organized because, as I've noticed, the teacher doesn't want to start the lesson when the classroom is still dirty. The classroom reflects a great environment. I could feel the great ambience of how good it is as a learning environment for the children who's studying there. After cleaning the room, before she starts the lesson, the students are required to pray first and after that the exercise so that the student has energy to listen or actively participate in class. The first lesson that she discusses in the Araling Panlipunan subject is about the tourist/ attractive spots in Region 1. During the discussion the students actively participate, listening well, and recite to their teacher questions. After the discussion, she hands them their seatwork. As I observe the classroom, students, and the teacher, I observe that the classroom is well organized,

the students are listening well and participating in the discussion, and they are well-mannered towards their teacher. I also observed that some of the students didn't participate in class and didn't know some of the pangasinan words but the teacher managed it well so that the students remained active. The strategies she used when the students didn't understand some of the pangasinan words she translated into tagalog words. When it comes to assessing the learning of the students, students use pencil and paper or notebook as a writing material, for me it's one of the best practices to improve their writing skills. When the afternoon came, After the discussion and activities about the other subject, the remaining time was used for remedial reading for those students who were having difficulties with reading. I can say that this was an effective strategy of the teacher because it makes the student engage and to actively participate. Second day, February 28, 2023, I was definitely overwhelmed by things that happened on this day that hadn't happened on my first day. I've seen that my cooperating teacher always ensures that the learning environment in the classroom is pleasant. She gave the pupils a warm, welcome feeling in the classroom. To make the classroom more pleasant, she added decorations like plants, pictures, and posters. Also, everything from the seating arrangements to the materials for instruction are well-organized. This morning I was with the teacher's students. I was impressed with the performance of the students. During this time, I was able to observe the class as the teacher used integrated technology as a means to an effective teaching and learning process. Their assessment is convenient for the student. In the afternoon, The subject she teaches is science and their topic is "bengatlan man-uusar ya elektrisidad" to easily understand the topic. One of those strategies she used is real life context which the students can relate to the lesson. Another thing is the integration of technology, she used technology to motivate the learners and to provide the learning process. After the discussion the students have an activity to answer and the teacher records the scores of his students. She used activity as an assessment tool for their learning. The last day of my observation, March 01, 2023. The teacher is teaching in the front and he has a student crying because his toy Jolens are missing. When he saw her crying he asked her and his student's answer was that her classmate took her toy that's why he was crying, he accused one of his classmates that he took it and her teacher asked him again are you sure he took it? and the boy replied no. So he told his student to apologize for falsely accusing him. By doing that I see the fairness when it comes to all his students and I saw how she disciplines his students in a respectful manner. Also, I gained knowledge about how to manage and handle pupils. In order to engage my students and facilitate their learning, I learned the different teaching strategies and techniques that I will use in my future career. I also learned about the enjoyment of teaching and how to love it, which is very important in every teacher and as well as to future teachers. The last thing I've noticed in CES is that the teacher and the students are very comfortable when interacting with each other and I came to witness how teachers interact with students when they come to school and greet each other with a smile and always show respect to everyone.

Teaching is not just a job but it is full responsibility to the students. Teaching is not only for students but also for parents, and the community. In my observation I saw how difficult it is to be a teacher but when you love to teach and you have a heart to teach, you can be a good teacher like teacher rachele. She is passionate about teaching, compassionate, and loves and his students.

2. Comment on your observations about the assessment tools, classroom management, teachers' actuations/behavior/demeanor; relationship with fellow teachers, higher authorities, other school personnel; relationship with the students, their methodologies, strategies, relationship with the students' parents (if applicable);

Before she starts her lesson, The class will sing and dance so the students have energy when the lesson starts, the children feel more energized and motivated to learn. When she start I saw that Mrs. Rachele is knowledgeable. She has strategies for facilitating the dialogue for her students. Because they grasped the lesson completely, the pupils responded quickly. To make learning more engaging and to encourage and improve student learning, she used a variety of approaches or methods during the exercise, including brainstorming, interactive learning, collaborative learning, and inquiry-based learning. The pupils were not scared to ask her questions about the activities they are participating in since she is personable and respectful. She cultivates relationships with her students

Apropos the stipulations under the following legal documents:

A. Code of Ethics for Professional Teachers (BPT Resolution No. 435 s. 1998)

The three days I observed at Caranglaan Elementary School, I observed Mrs. Rachele that she followed the laws and policies of the school to treat and discipline their students with justice. She also consistently upholds moral and ethical principles. At all times, He exudes professionalism.

B. Magna Carta for Public School Teachers (RA 4670)

I've noticed to Mrs. Rachele was working legally after her classes, and I saw that she fulfilled all of her obligations to the school. She also didn't waste any of her free time. The crucial items she will require for the upcoming teaching day will be prepared.

C. Philippine Professional Standards for Teachers (DepEd Order 42 s. 2017)

I noticed Mrs. Rachel says that when she creates lesson plans and resources, she prioritizes the needs, interests, and learning environment of her students. She considers herself to be introspective in the way she plans and presents her classes, and finds it helpful when students learn through discussions.
