**FIELD STUDY 6**  
**Deployment Narrative Report**

**Name:** Crisel G. Ballesteros

**Year & Section:** 3BEED-01

**School Assigned:** Bonuan Boquig Elementary School

**Grade Observed:** 5&6

**Date of Deployment:** February 27, 2023

**Cooperating teacher(s):**

Nona Faye C. Bautista

Maureen C. Seco

“ Education is for improving the lives of others and for leaving your community and world better than you found it.”

**-Mirian Wright Edelman**

During our 3 days observation at “**Bonuan Boquig Elementary School**”, I was assigned to observe Grade 5 and grade 6 ,grade 5 in the morning and 6 in the afternoon. When I entered the Classroom I noticed immediately that their Classroom was pleasantly clean and full of Instructional materials Such as Pictures . I observed that the School is Childfriendly because they are making sure that the students are learning. I’ve learned and observed a lot of things when it comes to teaching and learning process, it is not easy to deal with the students who are diverse and have different characteristics ,their attitudes ,tantrums and behaviors is not easy to handle all day.

My 3 days observation journey thought me the importance of patience, determination and perseverance in teaching. On the other hand I felt the joy inside the classroom. As I observed specifically when my cooperating teacher asked her student’s to resight about their previews discussion as their review the students participated actively by raising their hands and answering the teacher’s question politely, in that way effective teaching and learning is being integrated. The teacher also provides a right assistance to those students who need a support the most, she is very approachable, she give the right of education for each students and respects the diversity of each and everyone, especially the age, gender, religion and socio-economic. I also

observe that some of the grade 6 students are working to support their studies and help their parents. I have learned a lot about how a teacher does an ever challenging job, especially its hard to handle a Elementary Grades which includes monitoring students' behavior, making sure each and every student is involved in an active learning environment, and creating a safe, yet creative classroom environment.

I've notice that she uses a variety of teaching Strategy , Like Integrating Technology to the Classroom Set-up ,Which is Good for the learners to Catch the student's attention.teacher 'should never stop motivating learners and should always encourage them to do best they possibly can. I gain a better understanding of what teaching be like for in the coming years.

It was such a wonderful moment for me as a aspiring teacher to experience those kinds of observation our different journeys,and different schools will surely bring a big impact in our lives.
