► While observing I am taking notes every time I observe something. The teacher has instructional materials such as video presentation, book, card and chalk board. The video presentation is a video that the other teacher made which they call COT1, I know it because my mom is a teacher and I edited one too. When she teach music, I appreciate when the teacher sings to teach the melodic phrase. The Educational video they used has advantage and disadvantage. The advantage of it were the teacher can let her students learn by themselves (if the students are audio-visual learner). The disadvantage of it where you wouldn't know if the students are really listening, watching or learning from the educational video. When giving examples, the teacher gave examples that can be seen around the classroom. In disciplining the students the teacher will call on the specific student that is noisy and will talk him/her privately about the behavior of the student.
