#### Guide questions:

In the three days that I observed in the West Central Elementary School 1 or WCES 1 I witnessed different types of strategies of my CT or cooperating teacher on how to teach and discipline their students in the right ways. Also I saw on how they take care of their students they treat them like son and daughter and also I observe on how they take care of their classroom and how the teacher manage the classroom cleanliness or classroom environment and because of that I gained idea on how I'm gonna do on classroom management when the time is come or I'm a Licensed Professional Teacher. Also I observe how they manage the cleanliness or environment of their school they make sure that their school environment is very pleasant and when it come to the teachers on that school, their very kind and approachable to us they giving us a idea on how manage the students when they noisy, how to give or provide quality learning materials, provide quality knowledge to them also I observe the very systematic relationship between teachers and the parents of the students. So on my 3 days staying on their school I gained/learned lot of knowledge and idea on how I'm gonna handle and manage the whole class soon.
