

# FIELD STUDY 6

## PANTAL ELEMENTARY SCHOOL

DAY 1 (FEBRUARY 27, 2023)

Because Ma'am is not present during their English time because she needs to go in division on the first day of my observation, I gave them a task to complete based on what they discussed at the previous meeting, and I instructed and taught them what they should do.

This is my second observation day. In the photo, they are threading a linen during their time in EPP using the proper equipment and materials while applying fundamental sewing techniques. First, they must draw a line in manila paper and then cut the necessary length of linen.

### GRADE VI - HYACINTH

DAY2: This time, I give them a short activity in Aral Pan that they must complete while watching a lesson on TV. They must also create a script for their role-playing exercise about the Philippine Rehabilitation Act.

DAY 2(FEBRUARY 28, 2023)

This is my final day of observation, and I want to thank my cooperating teacher, Ma'am Alejandra M. Palaganas, who is very approachable and gave me some advise at the time, and I appreciate her for being one of my cooperating teachers that I handled. I also gave her a small token/gift of appreciation for welcoming us.

I asked my students to take a picture of us before I left, and they thanked me for teaching them their studies while Ma'am wasn't there. I really appreciated how courteous, engaged, and active they were in class.

DAY 3 (MARCH 1, 2023)
